

First Exhibitors Confirm Participation in TAROPAK 2026 Trade Fair

Preparations for the next edition of the TAROPAK Trade Fair are gaining momentum. The event, to be held on 23–25 September 2026 at the MTP Poznań Expo, is already attracting renowned representatives of the packaging, labeling, and logistics industries at the initial application stage. Among the first companies to confirm their participation are suppliers of advanced packaging technologies as well as manufacturers of packaging materials and marking systems.

The International Trade Fair of Packaging and Labeling TAROPAK serves as a platform for knowledge exchange, the presentation of technological innovations, and the establishment of business relationships across the entire packaging and logistics supply chain.

Among the first exhibitors is PHU BEST, a company that has specialized for years in delivering modern packaging machines and comprehensive automated lines. Its offer includes, among others, semi-automatic and automatic pallet stretch wrappers, carton forming machines, sealing machines, vacuum packaging solutions, and a wide range of packaging materials. PHU BEST solutions support process automation and cost optimization in manufacturing and logistics enterprises.

Participation has also been confirmed by Folmat, a company operating on the market since 2008 and specializing in plastics processing. The manufacturer is known for high-quality solutions for the packaging industry, industrial protection, and transport logistics. One of the company's key products is coreless stretch film, a solution that reduces waste, saves warehouse space, and supports pro-environmental initiatives undertaken by businesses.

Eco Save Group, an expert in packaging materials and logistics, has also joined the group of exhibitors. The company offers a comprehensive product portfolio—from cartons and pallets, through stretch films and paper and plastic void fill, to machines for producing void fill and marking systems. An additional advantage of Eco Save Group is its own transport fleet, enabling flexible and timely deliveries.

The metal packaging sector will be represented by FPS Polska Sp. z o.o., part of the international Innovative Canmakers Europe group. The company benefits from the extensive technological background of its parent company, Blechwarenfabrik Limburg GmbH, which has specialized for over 140 years in the production of metal packaging for the chemical and technical industries.

In the field of printing and marking technologies, INFOGRAF will present its offer. With 13 years of experience, the company provides equipment from renowned manufacturers, professional consulting, authorized service, and full warranty and post-warranty support. Its offer is aimed at companies seeking reliable marking and labeling solutions.

The list of first exhibitors also includes Druk Serwis 24, a Polish company specializing in the sale and servicing of product marking devices and system integration on production lines. The company's portfolio includes CIJ printers, high-resolution systems, laser solutions, and printing systems enabling serialization and personalization of packaging in accordance with GS1 standards.

Completing this group is ELABEL DUE, a distributor of marking and labeling systems, offering inkjet, thermal, and thermal transfer printers, as well as solutions for manual and automatic labeling of products and pallets. The company also provides comprehensive service and consulting support, helping businesses optimize production, warehousing, and transport processes.

“Even the first applications show that the upcoming edition of the TAROPAK Trade Fair will be a meeting place for market leaders, innovators, and practitioners from the packaging and labeling industries. We invite more companies to join the group of exhibitors and present their solutions to a wide audience,” encourages Weronika Jakubowska, Director of the TAROPAK Trade Fair.

Exhibitor registration is ongoing, and the list of companies confirming their participation will be systematically expanded.

Alongside TAROPAK, the POLAGRA Trade Fair and the Flavors of the Regions Festival will also take place.
